Smart Lock (ZigBee)

Product Introduction

This smart lock boasts high-level security and convenience with multiple access options, including M1 cards, fingerprints, passwords, and app control. With an IP65 rating, it effectively resists rain and dust, making it ideal for outdoors like villas and gardens. Offering a reliable, smart entry solution, it enhances both safety and ease of use for any home or office.

Features

- IP65 rating for outdoor installation
- Various unlocking methods available: Fingerprint, password, M1 card, and app
- Temporary passwords
- Tamper alarm/Unauthorized access alarm/Low battery alert
- Dual verification

Specification

- Model: F2
- Communication: ZigBee 3.0
- Operation: Semi-automatic lock
- Input Voltage: 6V DC
- Lock Body: 4585
- Battery: 4 AAA alkaline batteries
- Battery Life: 6 months (based on 10 uses per day in a stable laboratory environment at 25°C)

- Unlocking Methods: Fingerprint, password, M1 card (frequency: 13.56 MHz), app remote access, mechanical key
- Credential Capacity: 300 sets (maximum fingerprint capacity: 100)
- Lock Body: 4585
- Emergency Power: 5V
- Protection Rating: IP65
- Operating Temperature: -25 to 60°C
- Operating Humidity: 20 to 95% RH (non-condensing)
